# BASIC MAP READING SKILLS AND GENERAL GEOGRAPHY

## Section A: Multiple Choice Questions

*Choose the correct answer for each question. Each question carries 4 marks.*

1. Which of the following compass points is directly opposite to North-West?

[4Pts]

A. South-East

B. South-West

C. North-East

D. South

2. On a map with a scale of 1:20,000, what does 1 cm on the map represent on the ground?

[4Pts]

A. 20 meters

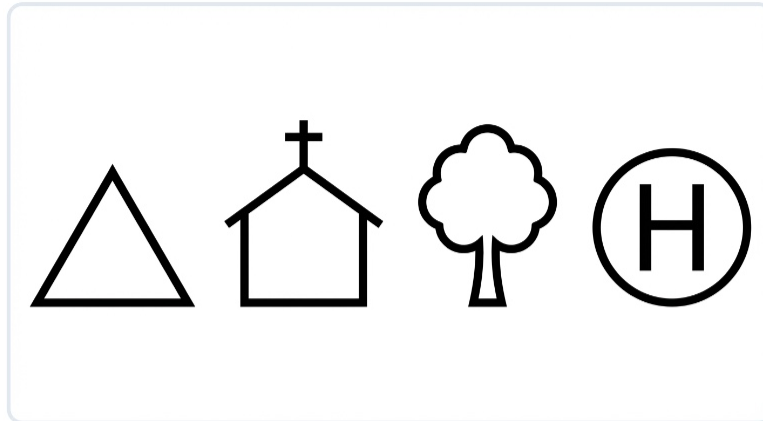

B. 200 meters

C. 2 kilometers

D. 20 kilometers

3. Which conventional sign is commonly used to represent a place of worship on a topographical map?

[4Pts]

A. A blue triangle

B. A black cross with a circle or square

C. A green tree symbol

D. A red letter H

4. In a 4-figure grid reference, what does the first two digits refer to?

[4Pts]

A. The Northing line below the feature

B. The Easting line to the left of the feature

C. The exact height of the feature

D. The distance from the North Pole

5. What feature is indicated when contour lines are very close together?

[4Pts]

A. A flat plain

B. A gentle slope

C. A steep slope

D. A river valley

**6. Which line of latitude divides the Earth into the Northern and Southern Hemispheres?**

[4Pts]

A. The Prime Meridian

B. The Tropic of Cancer

C. The Tropic of Capricorn

D. The Equator

**7. What is the whole circle bearing for the direction East?**

[4Pts]

A. 045°

B. 090°

C. 180°

D. 270°

**8. Which of the following is the largest ocean on Earth?**

[4Pts]

A. Atlantic Ocean

B. Indian Ocean

C. Arctic Ocean

D. Pacific Ocean

**9. Which tool is best used to measure the length of a curved river on a map?**

[4Pts]

A. A straight ruler

B. A piece of string or thread

C. A protractor

D. A compass

**10.** What is the primary function of the Prime Meridian?

[4 Pts]

A. It determines the climate zones

B. It marks 0° Latitude

C. It marks 0° Longitude and helps determine time zones

D. It divides the Earth into Eastern and Western hemispheres only for navigation safety

## Section B: Structured Questions and Map Reading

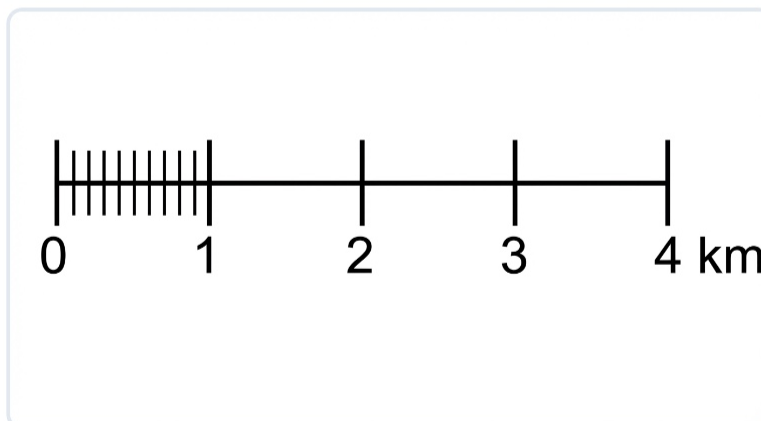

*Answer all questions in the spaces provided. Show your working for calculations.*

**11.** Study the linear scale provided below.

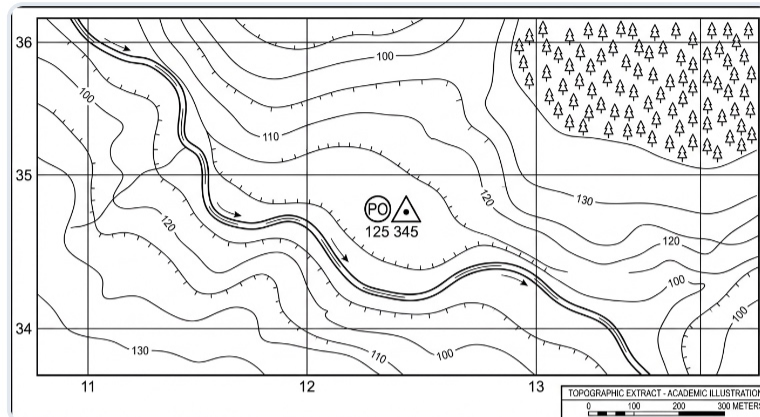

[10 Pts]

(a) Convert this linear scale into a Representative Fraction (R.F.).

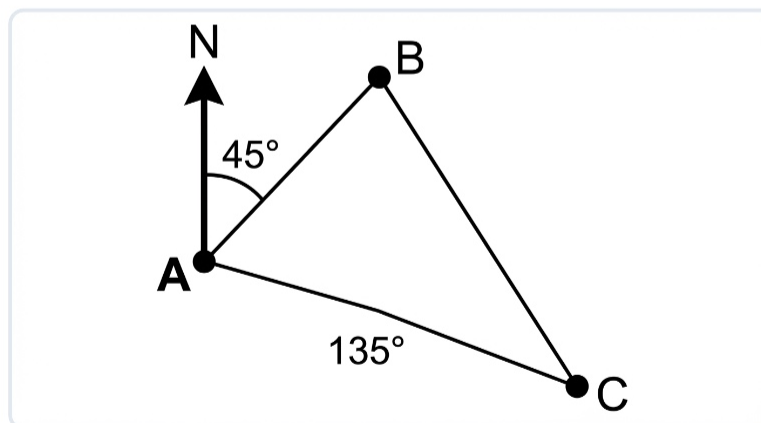

(b) If the distance between two towns on the map is 5 cm, calculate the actual ground distance in kilometers based on this scale.

- 12.** Refer to the provided topographical map extract of 'Area X'. [10 Pts]
- (a) Identify the feature located at the 6-figure grid reference 125345.
- (b) Give the 4-figure grid reference for the dense forest area located in the North-East corner of the map.

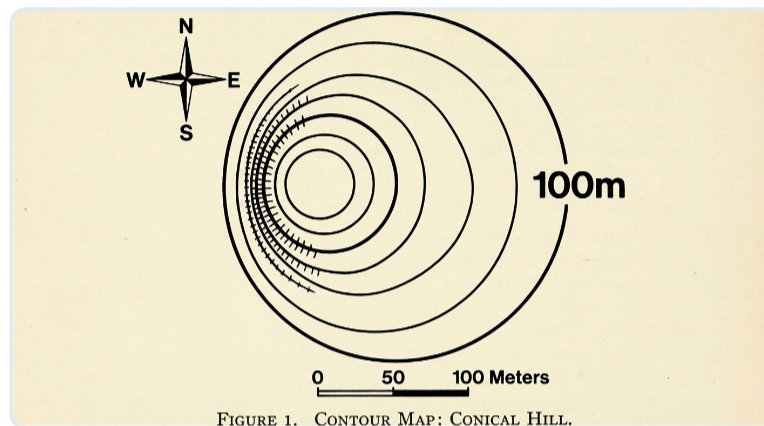

- 13.** Using the map provided in Question 12 or the simplified diagram below showing Points A, B, and C: [10 Pts]
- (a) Determine the compass direction of Point B from Point A.
- (b) Measure and state the whole circle bearing of Point C from Point A.

**14.** Study the contour map provided.

[15 Pts]

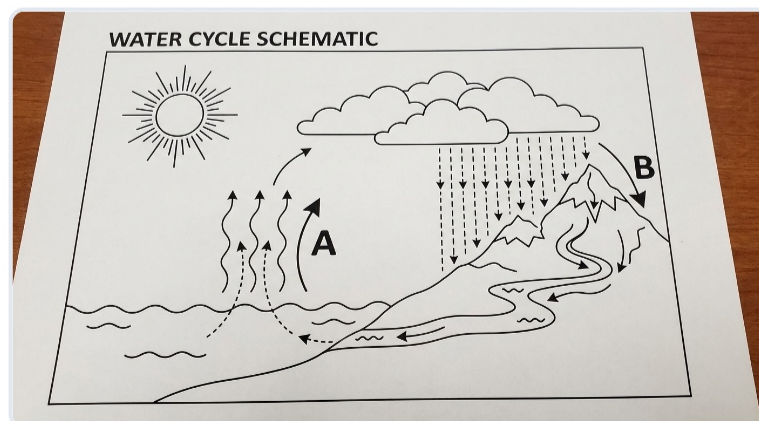

- (a) Identify the landform shown by the contour lines (e.g., conical hill, plateau, ridge).
- (b) Calculate the approximate height of the highest point if the contour interval is 20 meters and the outer line is 100 meters.
- (c) Describe the steepness of the slope on the western side compared to the eastern side.

**15.** The diagram below illustrates the Water Cycle.

[15 Pts]

- (a) Name the processes labeled A (rising vapor) and B (falling rain).
- (b) Briefly explain how the process labeled 'A' occurs.
- (c) Why is this cycle important for general geography and life on Earth?

REF: GEOGRAPHY - SET B
