

Tutor Jolly School

Name: _____

Grade: _____

Class: _____

Class No: _____

CHAPTER 1: INTRODUCING SCIENCE

Section A: Multiple Choice Questions

1. Which of the following is the most appropriate action if you accidentally spill a chemical on your hand in the laboratory?

[2 Pts]

A. Wipe it off with a paper towel immediately.

B. Wash your hands with plenty of running water and report to the teacher.

C. Apply a plaster over the affected area.

D. Wait until the end of the lesson to wash it off.

2. Look at the hazard warning symbol shown below. What does this symbol represent?

[2 Pts]

A. Explosive

B. Flammable

C. Corrosive

D. Toxic

3. Which of the following apparatus is best suited for measuring exactly 42 cm³ of water?

[2 Pts]

A. Beaker

B. Conical Flask

C. Measuring Cylinder

D. Test Tube

4. When lighting a Bunsen burner, which of the following describes the correct state of the air hole to obtain a luminous yellow flame?

[2 Pts]

A. Fully open

B. Fully closed

C. Half open

D. It does not matter

5. Which of the following is the standard SI unit for measuring temperature?

[2 Pts]

A. Degree Celsius (°C)

B. Degree Fahrenheit (°F)

C. Kelvin (K)

D. Joule (J)

6. In the scientific method, what is a 'hypothesis'?

[2 Pts]

A. A conclusion based on results.

B. A proposed explanation that can be tested.

C. A measurement taken during an experiment.

D. A safety rule in the laboratory.

Section B: Structured Questions

Answer all questions in the spaces provided.

7. The diagram below shows three common pieces of laboratory apparatus labeled A, B, and C.

[6 Pts]

- (a) Identify the names of apparatus A, B, and C.
(b) State one common use for apparatus B.

8. The diagram below shows a Bunsen burner.

[8 Pts]

- (a) Name the parts labeled X and Y.
(b) Explain why the air hole is opened when heating a substance.
(c) What is the color of the flame when the air hole is fully open?

[8 Pts]

- 9.** A student wants to find the volume of an irregular stone.
- (a) Look at the diagram showing the initial water level (Figure 1) and the water level after adding the stone (Figure 2). Record the volume reading for Figure 1 and Figure 2.
 - (b) Calculate the volume of the stone. Show your working.
 - (c) What is the name of the curved surface of the water shown in the cylinder?

[6 Pts]

- 10.** A student investigates how the temperature of water affects the time it takes for a sugar cube to dissolve.
- (a) Identify the independent variable in this investigation.
 - (b) Identify the dependent variable.
 - (c) State one variable that must be kept constant to ensure a fair test.

- 11.** The picture below shows students working in a science laboratory. There are several safety hazards visible.
- (a) Identify TWO different unsafe actions shown in the picture.
- (b) For each action identified in (a), explain why it is dangerous.
- (c) Suggest one safety rule that should be followed to prevent accidents like these.
