Name: _____

Grade: _____

Class: _____

Class No: _____

COMPUTER SYSTEMS AND SCRATCH PROGRAMMING

Section A: Computer Systems

Choose the best answer for each question regarding computer hardware and software.

1. Which of the following devices is used to input data into a computer?

[1Pts]

1.

[0Pts]

A. Monitor

B. Scanner

C. Speaker

D. Projector

2. Which component is known as the 'brain' of the computer where most calculations take place?

[1Pts]

A. Hard Disk Drive

B. Power Supply Unit

C. Central Processing Unit (CPU)

D. Random Access Memory (RAM)

3. What is the main difference between RAM and a Hard Drive?

[1Pts]

- A. RAM is permanent storage, Hard Drive is temporary.
- B. RAM is volatile (loses data when power is off), Hard Drive is non-volatile.
- C. RAM stores the operating system, Hard Drive stores only photos.
- D. There is no difference.

4. Which of the following is an example of System Software?

[1Pts]

- A. Microsoft Word
- B. Google Chrome
- C. Windows 10
- D. Scratch

5. Computers use a number system consisting of only 0s and 1s. What is this system called?

[1Pts]

5.

[0Pts]

- A. Decimal
- B. Binary
- C. Hexadecimal
- D. Octal

Section B: Scratch Programming Basics

Select the correct option related to the Scratch programming environment.

6. In Scratch, what is the name of the characters or objects that perform actions on the stage?

[1Pts]

A. Scripts

B. Sprites

C. Costumes

D. Backdrops

7. Which block category is color-coded blue and controls the movement of the sprite?

[1Pts]

A. Looks

B. Sound

C. Motion

D. Events

8. Identify the function of the block shown in the image.

[1Pts]

8.

[0Pts]

A. It stops the program.

B. It starts the script when the green flag is clicked.

C. It repeats the code forever.

D. It waits for 1 second.

9. What are the X and Y coordinates for the exact center of the Scratch stage?

[1Pts]

9.

[0Pts]

A. X: 100, Y: 100

B. X: 0, Y: 0

C. X: 240, Y: 180

D. X: 10, Y: 10

10. Which block allows a sprite to say a message for a specific amount of time?

[1Pts]

A. Say 'Hello!' for 2 seconds

B. Think 'Hmm...'

C. Ask 'What's your name?' and wait

D. Play sound 'Meow'

Section C: Logic and Algorithms

Analyze the logic and predict the outcome of the following programming scenarios.

11. What will happen if you use a 'Forever' block around a 'Move 10 steps' block? [1Pts]

11.

[0Pts]

- A. The sprite will move 10 steps once and stop.
- B. The sprite will continuously move until it hits the edge.
- C. The sprite will not move at all.
- D. The sprite will move back and forth.

12. Which category contains the 'If... Then' block used for making decisions? [1Pts]

- A. Control
- B. Sensing
- C. Operators
- D. Variables

13. If a sprite's direction is set to 90 degrees, which direction is it facing?

[1Pts]

A. Up

B. Down

C. Left

D. Right

14. What is an algorithm?

[1Pts]

A. A type of computer virus.

B. A step-by-step set of instructions to solve a problem.

C. A hardware component inside the CPU.

D. A specific type of computer monitor.

15. Look at the visual. If the user presses the Space key, what will the sprite do?

[1Pts]

15.

[0Pts]

A. Move forward 15 steps.

B. Rotate clockwise by 15 degrees.

C. Rotate counter-clockwise by 15 degrees.

D. Disappear from the stage.
